## International Equity Fund

As of March 31, 2009

### Investment Philosophy

The International Fund uses a fundamental, bottom-up investment approach to construct a concentrated 45-stock international equity portfolio. There is a three step process to add value: stock research; global sector analysis; and portfolio construction. The fund is managed by six global sector managers who focus on the growth, value, and risk drivers. There are 30 regionally located analysts who identify the best stock picks per industry sector. Regional exposure is then balanced according to a risk-budget.
