

BF&M GOLDEN ACCUMULATOR – SMA FUNDS

Fortis International Equity

As of Mar-10

Benchmark: MSCI EAFE - Price

Fund Philosophy

The International account uses a dynamic asset allocation approach using four investment strategies provided by Fortis Investment Management. A core global equities strategy seeks to achieve consistent excess return with lower risk than the MSCI World Index. A minimum of 65% of the fund's assets is in equities. The remaining 35% is tactically allocated between three global bond strategies: an emerging market bonds strategy which invests in bonds and debt securities of emerging market countries; a convertible bond strategy investing primarily in convertible bonds and some equity securities; and a high yield bond strategy which invests primarily in global high yield corporate bonds.

Performance Analysis
